

# Program Guide

## Residential High-Efficiency Central Air Conditioner Rebate Program

Naperville is offering residential electric customers a high-efficiency air conditioner rebate program for replacement units rated 15 Seasonal Energy Efficiency Ratio (SEER) or 14.3 SEER2 or higher. One rebate limit per household. Rebates will end when all funding is expended; projects purchased or installed in the fiscal year when all funding is expended will not be eligible for future incentives. New construction not eligible.

*100% complete applications with required documentation must be received within 120 days of installation.*

Incentives for qualifying Central Air Conditioning (AC) units (issued as utility billing credit):

- \$300 – 15 SEER or 14.3 SEER2
- \$400 – 16 SEER or 15.3 SEER2
- \$600 – 18 SEER or 17.2 SEER2

\*If both SEER and SEER2 are listed on the AHRI certification, SEER will be used to calculate the incentive.

\*SEER/SEER2 ratings are obtained from the AHRI certificate and may differ from product literature depending on the combination of equipment installed (AC, coil, furnace).

Documentation must include (JPG or PDF formats only):

- A copy of your **dated, itemized, paid** purchase receipt.
- Proof of AC Indoor Coil and Furnace model numbers that AC is installed with (.jpg or .pdf photo of labels, warranty registration, or indicated on invoice).
- Documentation from Manufacturer and Installer proving the SEER/SEER2 rating, cooling capacity and EER rating. *Tip: Customers can get this information from the AHRI certificate ([www.ahridirectory.org](http://www.ahridirectory.org)), their vendor, or owner's manual. **If EER rating is not provided, the utility will assume the lowest acceptable efficiency level i.e. EER 12.5***
- A photo of the AC outdoor unit's serial number.
- Appropriate AHRI certificate with model #'s of new AC unit, Indoor cased coil, and Furnace this new AC unit is installed with. Obtain from your installer or [www.ahridirectory.org/](http://www.ahridirectory.org/)
