

Program Guide

Air Conditioner (AC) Tune Up Rebate

Rebates are being offered to City of Naperville Electric Utility residential customers who have an air conditioning unit tune-up (once every three years).

The air conditioning tune-up rebate program is \$25 and is available to residential customers once during each three-year period.

All rebates will be issued as a credit to the electric utility bill of the customer at the service location where the work was performed.

Residential customers must contribute to the Naperville Renewable Energy Program at the \$5 per month or above level for a minimum of five years after award date.

100% complete applications with required documentation must be received within 120 days of service.

Rebates will end when all funding is expended. Projects PURCHASED OR INSTALLED in the calendar year when all funding is expended will NOT be eligible for future incentives.

Documentation must include (PDF or JPG formats only):

- Current Utility bill showing applicant is a contributor to the Naperville Renewable Energy Program (a minimum of \$5 per month for at least 5 years after award).
- A copy of dated, marked paid installer invoice(s) showing your AC tune-up costs and work done at the project location.

For questions about the Air Conditioner Tune Up rebate program contact Payton Schield at SchieldP@naperville.il.us or (630) 305-5357.
