How to Add a Comment Using the PublicCoordinate Mapping Tool

Mapping Tool Webpage: https://app.publiccoordinate.com/#/projects/NapervilleRIP/map

1 When you click on the webpage URL, a pop-up screen appears. This screen gives information about the Road Improvement Plan project and instructions for providing feedback. When you are done reading, click the **OK** button.

2 Click on the **Add Comment** option on the right-hand side of the screen. You will be asked to select a comment category. You can only select one category at a time. Comments may include observations, concerns, ideas or questions.
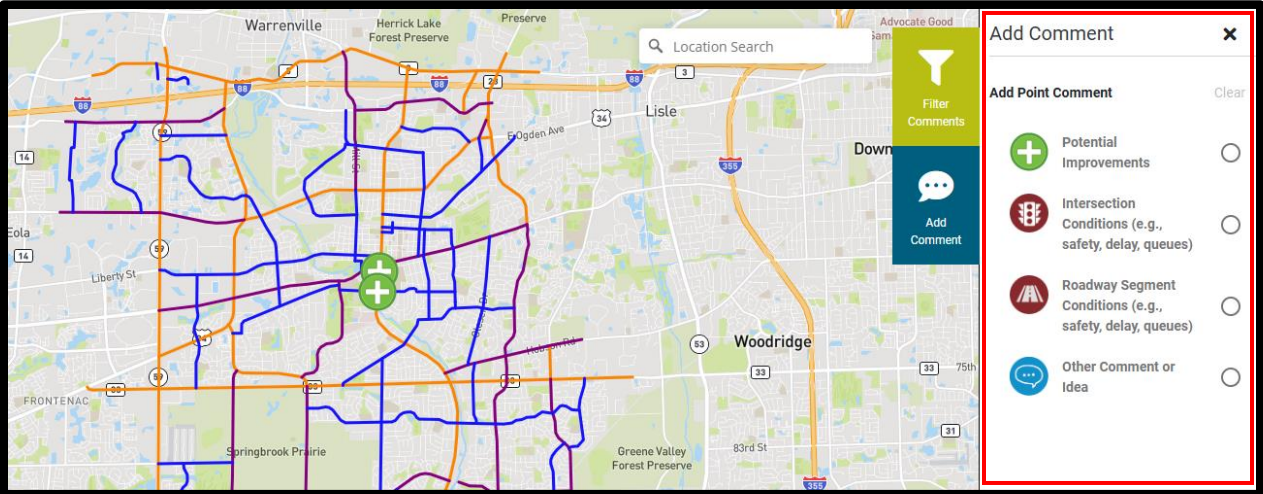

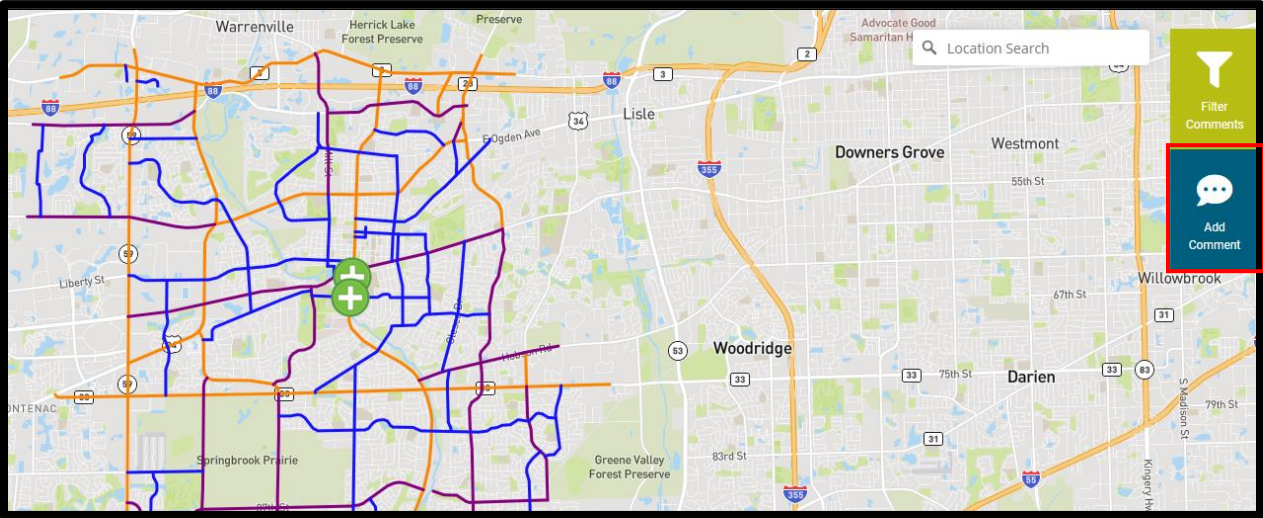

Here is more information about the different categories:

- Potential Improvements – Select this category if you have an idea for a potential road improvement.
- Intersection Conditions – Select this category if you want to comment about your experience(s) with a specific intersection.
- Roadway Conditions – Select this category if you want to comment about your experience(s) with specific roadways.
- Other Comment or Idea – Select this category if you have a comment or idea that doesn't fit within the other three categories.

Tip: Three roadway classifications are color-coded and labeled on the map. These classifications designate the different roadway types and their function. A list of the roadway definitions can be found on the [Road Improvement Plan project webpage](#).

**3** After selecting a category, you will see a prompt that says, **"Click anywhere on the map to add a comment."** Navigate the map to find the specific roadway, intersection or area you want to comment about. Click on that location.
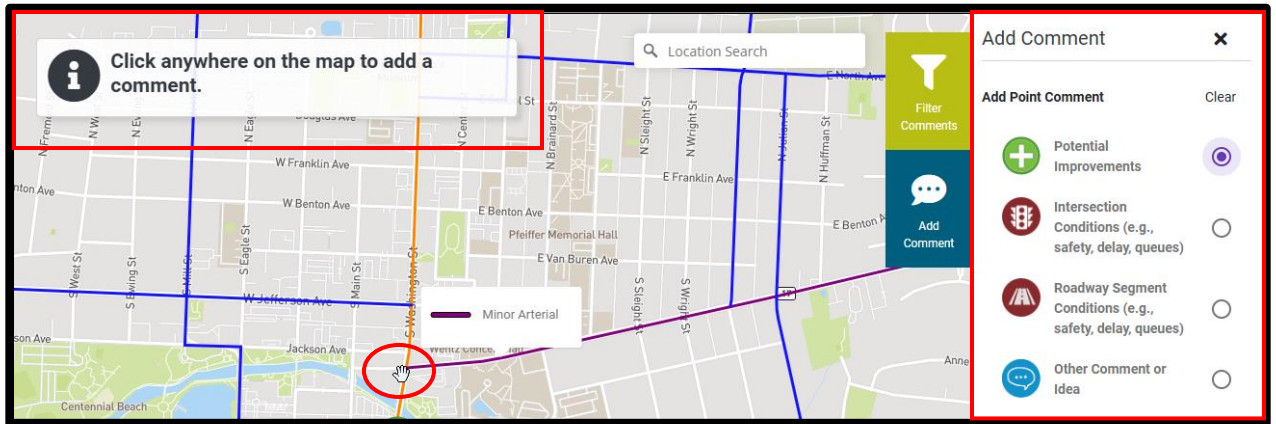

Tip: You can search for a location on the map using the Search Bar at the top.
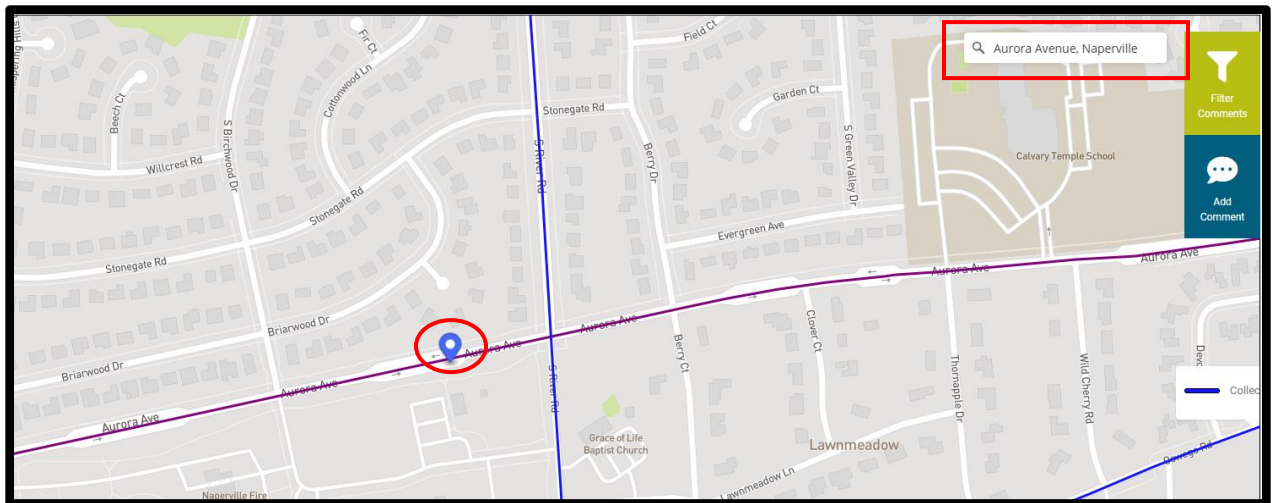

4 Type your comment and select **Submit**. If you decide not to submit the comment, click **Cancel.** You should see an icon on the map where you submitted the comment. If you hover over the icon, your comment should be visible.

Add a southbound right turn lane. (Potential Improvements)
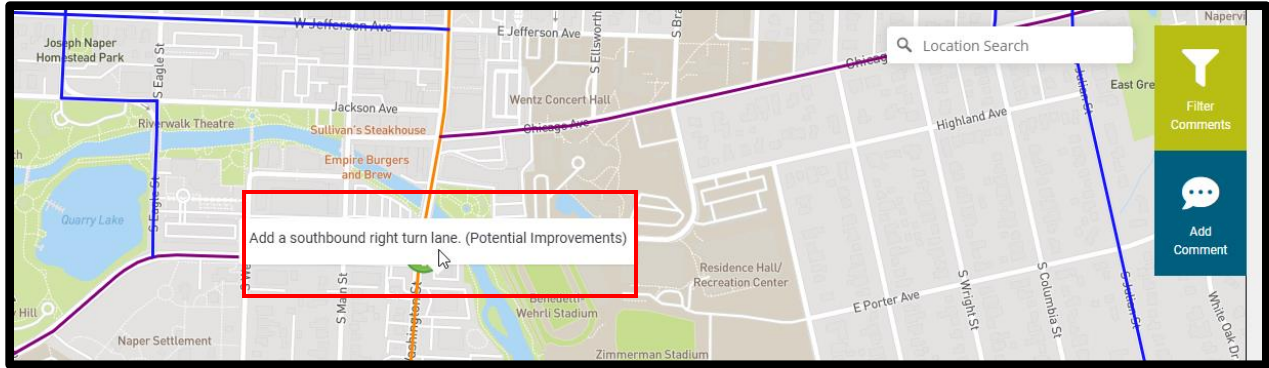

5 If you have a general comment or an idea that is *not* tied to a specific roadway or area, you can click anywhere on the map to submit your comment.

6 If you experience technical issues or accessibility barriers using this map, please email publiccoordinate@kimley-horn.com.

7 Repeat these steps to submit additional comments. All public comments will be summarized and considered as part of the Road Improvement Plan.
